INTRODUCTION & PROBLEM STATEMENT

Teachers face challenges with paper-based quizzes due to the time-consuming process of creating, distributing, and grading them. Campus Quizzer is an online quiz system designed to streamline this process by enabling easy quiz creation, fast student access, and instant result generation.

A colorful illustration on the left side of the slide depicts a teacher in a yellow hoodie pointing towards the right with their right hand. In the center, a student in an orange hoodie is shown from behind, looking at a smartphone which displays a magnifying glass icon. A large magnifying glass is positioned above the phone, focusing on it. The background is a textured blue.

PROJECT OBJECTIVES

Campus Quizzer is designed to be user-friendly for both teachers and students. Teachers can easily create, edit, and delete quizzes. The system automatically grades quizzes and maintains a secure environment to prevent cheating.

SYSTEM FEATURES (INPUTS, OUTPUTS & SCOPE)

- Teachers add questions and answers.
- Students submit quizzes online.
- Instant scores and reports are generated.
- Designed for universities with options to add timers and leaderboards.

A stylized illustration of a person from the waist up, facing right. They have short brown hair and are wearing a yellow and orange striped shirt. Their right hand is pointing towards the right side of the frame. A large white magnifying glass is positioned above their head, focusing on their face. To the right of the magnifying glass, there is a large blue checkmark icon with a black outline.

DEVELOPMENT PROCESS

We use the Waterfall Model to develop Campus Quizzer. The process includes communication, planning, modeling, construction, and deployment phases to design, build, test, and launch a smooth and reliable quiz system.

SYSTEM REQUIREMENTS

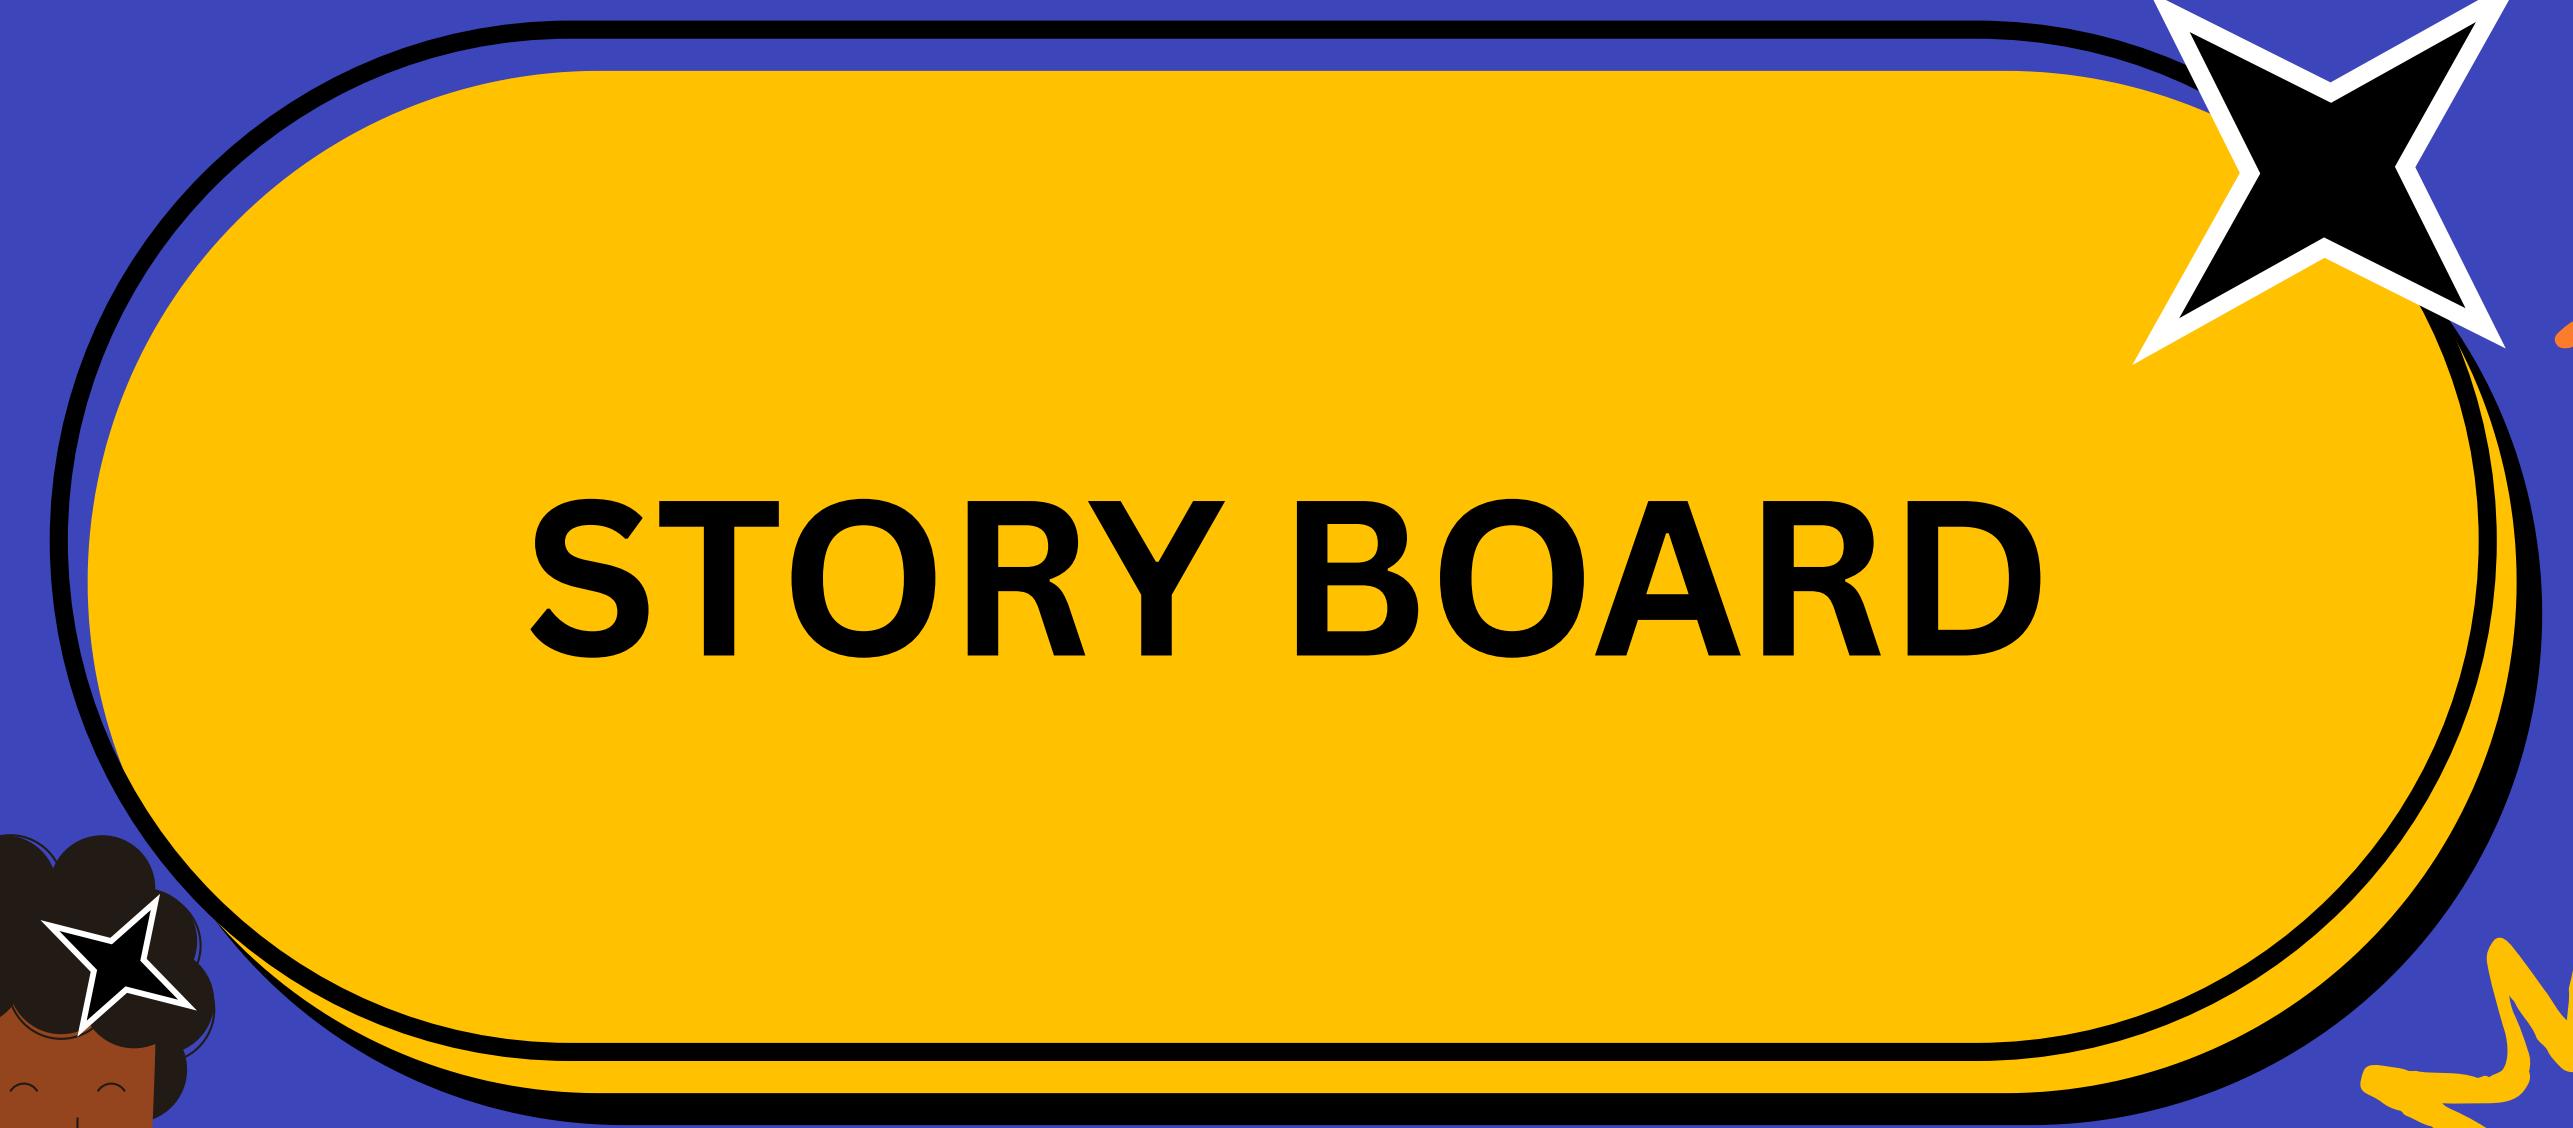

✓ FUNCTIONAL REQUIREMENTS:

- USER REGISTRATION & LOGIN
- TEACHERS CAN CREATE, EDIT, DELETE QUIZZES
- STUDENTS CAN ATTEMPT QUIZZES & VIEW RESULTS
- SYSTEM GENERATES SCORES & PERFORMANCE REPORTS

⚙ NON-FUNCTIONAL REQUIREMENTS:

- SMOOTH PERFORMANCE WITH MULTIPLE USERS
- ACCESS LIMITED TO REGISTERED USERS
- SIMPLE AND USER-FRIENDLY INTERFACE

STORY BOARD

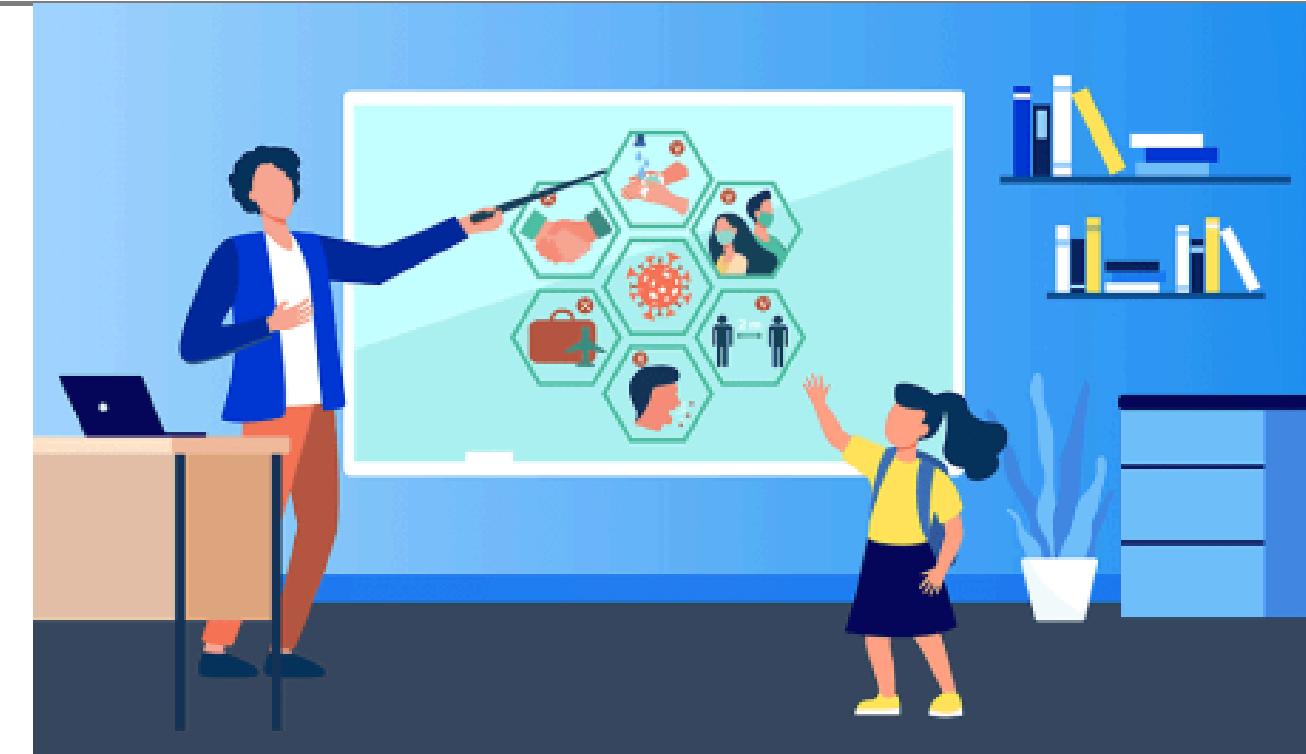

Mrs. Khan is tired of making and grading paper quizzes, which take too much time.

She finds an Online Quiz System where she can create quizzes easily and students can take them online.

Students take quizzes on their devices and get instant scores with correct answers.

Mrs. Khan gets detailed reports instantly and saves time for teaching more.

THANK YOU
